Education

•Bachelor of Technology in Electronics and Telecommunication *2021-25*
K J Somaiya College of Engineering, Mumbai CGPA:7.59

Personal Projects

•FitterCoin *2025 September*

Blockchain-driven fitness app that converts user activity into crypto rewards to boost motivation and retention.

- Built a Web3-enabled fitness rewards engine that converts user steps into on-chain tokens using smart contract integrations.
- Built the project during the 36-hour **ETH GLOBAL NEW DELHI** hackathon and won **3500** dollars across two tracks.
- Led backend architecture and feature development, including token reward logic, smart contract deployment, and tokenomics design.

•Data Scrapper *2025 January*

An end to end data scrapper for a particular website with dynamic content

- Used Redis to create and distribute jobs across workers for dynamic scraping workloads.
- Improved the existing scraper's performance by **91.67 percent**.
- Hosted the backend on AWS and exposed APIs for downstream consumption.
- Built the system to handle more than **5000+ requests** at a time.

•Medicare *2024 October*

Made an End to End Product based on IOT to help senior citizens with their medical journey

- Built the hardware prototype around a custom PCB for the IoT workflow.
- Worked on the backend by developing APIs for device and application communication.
- Handled embedded programming with Firebase and ESP-based components.

Experience

–Oracle Financial Services Software *July 2025 - Present*
Associate Consultant Offline

* Architected and built an enterprise SSO/SAML authentication application from scratch, designing gateway flows, backend auth logic, token handling, redirects, and error paths for production use.
* Delivered backend and platform integrations across Oracle banking environments, including FCUBS and WebLogic-based deployments, while handling runtime configuration, database connectivity, JNDI, and multi-data source setup.
* Built internal operational tooling, including a WebLogic monitoring application for server visibility and a production log pruner to streamline support workflows and incident analysis.
* Implemented authentication enhancements across connected applications, including NTLM support in Saga and SSO behavior improvements across JSF, JSP, and frontend login flows.
* Automated release and operational tasks through Jenkins pipelines and Bash utilities, while resolving Kubernetes, deployment, build, and system-level production issues across enterprise environments.

–Affix Center *January 2025 - June 2025*
IT Intern Offline

* Worked on data migration from on-site systems to cloud environments and supported data segregation efforts.
* Worked on the development of a smart heart rate tracker.
* Contributed to backend development and database-related tasks for internal projects.

–KJSCE Codecell *August 2023 - June 2024*
Creative Head Offline

* Led the visual content strategy for Instagram and other media platforms managed by the council.
* Created design and video assets for events, announcements, and community engagement campaigns.
* Led a team of contributors to plan, produce, and publish creative content consistently.

Technical Skills and Interests

Languages: Python, Java, C++, TypeScript, Dart, Bash
Backend / Platform: Node.js, Jenkins, Kubernetes, Linux, JNDI, SSO, SAML, NTLM, CI/CD Automation
Databases / Enterprise Tools: Oracle DB, MySQL, PostgreSQL, Oracle WebLogic Server, FCUBS, AWS, SAP
Developer Tools: VS Code, Git, GitHub, Postman, Firebase, Figma, Canva, After Effects, Premiere Pro

Achievements

–**Winner @**Eth Global New Delhi *Sept 2025,New Delhi*
–**1st @** VIT Wadala CodeForge *2024*
