

Dhruv Bhagatkar

Bachelor of Technology

K J Somaiya College of Engineering, Mumbai

Backend Engineer building APIs, platform integrations, and production-grade systems.

Website: thisisdhruv.in

EDUCATION

•Bachelor of Technology in Electronics and Telecommunication

2021-25

K J Somaiya College of Engineering, Mumbai

CGPA:7.59

EXPERIENCE

•Oracle Financial Services Software

Jul 2025 - Present

Associate Consultant

Offline

- Architected and deployed an enterprise SSO/SAML authentication system for a banking environment serving **10M+ customers** across **24 states** and **2 union territories**, designing gateway flows, token validation, redirects, and error handling.
- Reduced FCR BLOB log size by **6x** and lowered CPU usage by more than **20 percent** in production by implementing structured JSON logging, significantly cutting disk consumption.
- Developed a WebLogic monitoring application covering **200+ endpoints**, improving server health visibility, runtime inspection, and production environment monitoring.
- Integrated backend services across FCUBS and Oracle WebLogic deployments, managing runtime configuration, database connectivity, JNDI resources, and multi-data source setups.
- Implemented NTLM support in Saga and delivered Bash/Jenkins utilities for deployment support, incident response, and production issue resolution across enterprise environments.

•Affix Center

Jan 2025 - Jun 2025

IT Intern

Offline

- Supported migration of on-site systems to cloud environments, contributing to data segregation and deployment readiness.
- Developed backend and database components for internal projects and contributed to a smart heart rate tracker across software and device-facing requirements.

•KJSCE Codecell

Aug 2023 - Jun 2024

Creative Head

Offline

- Led a **6+ member** creative team as Creative Head, coordinating visual content strategy and publishing across council media platforms.

TECHNICAL SKILLS AND INTERESTS

Languages: Java, Python, Bash, C++, TypeScript, Dart

Backend: REST APIs, Spring Boot, Node.js, React.js, SSO, SAML, NTLM, JNDI

DevOps / Platform: Jenkins, Kubernetes, Linux, CI/CD, Oracle WebLogic Server, AWS

Databases: Oracle Database, SQL, MySQL, PostgreSQL, Firebase

Tools / Platforms: Git, GitHub, Postman, FCUBS, SAP, VS Code, Figma, Canva, After Effects, Premiere Pro

PERSONAL PROJECTS

•FitterCoin

Blockchain-based fitness platform converting user activity into crypto rewards through backend services and smart contract integrations.

- Delivered a multi-chain Web3 fitness rewards platform in **36 hours**, winning **2 ETHGlobal tracks** with a 4-member team.
- Deployed **5+ smart contracts** and integrated **3 chains/protocols** to convert user activity into on-chain rewards.

•Data Scraper

Jan 2025

End-to-end data scraping system for dynamic content, focused on concurrency, job orchestration, and reliable API delivery.

- Improved scraper performance by **91.67 percent** by building a Python REST backend with Redis-backed job orchestration.
- Tested the AWS-hosted system with **20 workers**, **100 jobs**, and **5000+ concurrent requests**.

•Medicare

Oct 2024

End-to-end IoT healthcare product for senior citizens combining embedded systems, custom hardware, and backend APIs.

- Created a working IoT healthcare prototype with custom PCBs and **5+ sensors** for senior citizen health support.
- Implemented React and Firebase workflows for reminders, alerts, health tracking, caregiver notifications, and medicine tracking.

ACHIEVEMENTS

–**Winner @Eth Global New Delhi**

Sep 2025, New Delhi

–**1st @ VIT Wadala CodeForge**
