

Dhruv Bhagatkar

Bachelor of Technology

K J Somaiya College of Engineering, Mumbai

Backend Engineer building APIs, platform integrations, and production-grade systems.

Website: thisisdhruv.in

EDUCATION

•Bachelor of Technology in Electronics and Telecommunication

2021-25

K J Somaiya College of Engineering, Mumbai

CGPA:7.59

EXPERIENCE

•Oracle Financial Services Software

July 2025 - Present

Associate Consultant

Offline

- Architected and built an enterprise SSO/SAML authentication application from scratch, designing gateway flows, backend auth logic, token validation, redirects, and error handling for production use.
- Reduced FCR BLOB log size by **6x** and lowered CPU usage by more than **20 percent** in production by implementing structured JSON logging, significantly cutting disk consumption.
- Integrated backend services across FCUBS and Oracle WebLogic-based deployments, managing runtime configuration, database connectivity, JNDI resources, and multi-data source setups.
- Engineered secure login integrations across JSF, JSP, and frontend applications, and implemented NTLM support in Saga to extend enterprise authentication flows.
- Built a WebLogic monitoring application, a production log pruner, and Bash/Jenkins utilities while resolving Kubernetes, deployment, build, and system-level production issues across enterprise environments.

•Affix Center

January 2025 - June 2025

IT Intern

Offline

- Supported migration of on-site systems to cloud environments, contributing to data segregation and deployment readiness.
- Built backend and database components for internal projects and contributed to a smart heart rate tracker across software and device-facing requirements.

•KJSCE Codecell

August 2023 - June 2024

Creative Head

Offline

- Led the visual content strategy and coordinated contributors across the council's media platforms.

TECHNICAL SKILLS AND INTERESTS

Languages: Java, Python, Bash, C++, TypeScript, Dart

Backend: REST APIs, Node.js, SSO, SAML, NTLM, JNDI

DevOps / Platform: Jenkins, Kubernetes, Linux, CI/CD, Oracle WebLogic Server, AWS

Databases: Oracle DB, MySQL, PostgreSQL

Tools / Platforms: Git, GitHub, Postman, FCUBS, SAP, Firebase, VS Code, Figma, Canva, After Effects, Premiere Pro

PERSONAL PROJECTS

•FitterCoin

Built a blockchain-based fitness platform that converts user activity into crypto rewards through backend services and smart contract integrations.

- Designed and built a Web3 rewards engine that converts step activity into on-chain tokens through backend services and smart contract workflows.
- Built the project during the 36-hour **ETH GLOBAL NEW DELHI** hackathon and won **3500** dollars across two tracks.

•Data Scraper

2025

Built an end-to-end data scraping system for dynamic content, focused on concurrency, job orchestration, and reliable API delivery.

- Designed a Redis-backed job distribution pipeline to parallelize scraping workloads across workers.
- Improved scraper performance by **91.67 percent** and scaled the AWS-hosted backend to handle more than **5000+** requests by optimizing concurrency and API processing.

•Medicare

2024

Built an end-to-end IoT healthcare product for senior citizens by combining embedded systems, custom hardware, and backend APIs.

- Designed the hardware prototype around a custom PCB to support the IoT device workflow.
- Built backend APIs and implemented embedded integrations using Firebase and ESP-based components.

ACHIEVEMENTS

–**Winner** @Eth Global New Delhi

Sept 2025, New Delhi

–**1st** @ VIT Wadala CodeForge

2024
